

# F2337

## For that ultra-low profile look.

Do you want your new TV flush against the wall like a work of art? With the F2337, you get the perfect solution for mounting your TV very close to the wall while still providing room for cables.

Quick release cords allow you to access connections, and easily move the placement of your TV without reinstalling. It's designed to work with a wide range of VESA patterns so when you upgrade your TV, you can still use the same mount.

Compatibility, strength, and sophistication. For stationary installations that do not require a range of motion, the F2337 is the mount for you.

- Product weight: 4.4 lb (2.0 kg)
- UPC: 800152712178

### STRONG WALL PLATE

The F2337 is designed with two rows of mounting holes for extra strength and uses four lag bolts to support heavier TVs up to 100 pounds. It provides some offset abilities, depending on your TV size, allowing you to position your TV anywhere along the wall plate. Made of solid steel, the 19.7" wall plate mounts on 16" stud spacing.

### FITS VESA SIZES TO 400x300

The F2337 is compatible with a range of VESA patterns from 100x100 up to 400x300.

### QUICK LOCK MECHANISM

The spring-loaded locks click neatly into place as you swing the bottom of your TV to the wall. Always within reach, the quick release cords extend below the mount and offer a quick and easy way to detach your TV from the mount and remove it from the wall. This makes it easy to install or remove cables at the back of your TV.

### HORIZONTAL LEVELING SCREWS

Located on each of the vertical bracket arms is a leveling screw that is used to fine-tune the angle of your TV. If you notice that your TV is not completely level, use the leveling screws to make the necessary adjustments so that it's perfectly aligned.

### ATTRACTIVE END CAPS

Now you can have style and function with smooth, polished end caps that cover the ends of your mount and give you a clean, modern look.
